

GENERAL Information

Sustainability

As industry leaders, it is our responsibility to advocate the protection and preservation of our environment. At Ekitta, we have an obligation to our clients, ourselves and the world community to promote recycling, reuse and responsibility in all policies and practices of our business.

For the manufacturing of our products, we are dedicated to the purchasing of metals from suppliers who are vested in recycling, channeling waste solvents through recovery companies and recycling all scrap metals. We strive to formulate finishes that maximize employee safety as well as minimize environmental impact. We are continuously on the lookout for the most up-to-date research and technology to improve our in-house recycling and reuse methods.

Ekitta metal products are 100% recyclable, and hand made in Austin, Texas, by skilled employees who take pride in fabricating a quality product. Each product is made to order with the finest craftsmanship and attention to detail, using materials supplied by companies located in the USA.

We owe Nature, in part, for our success and acknowledge this by striving to be environmentally sensitive in all aspects of our business. Our plant is operated on 100% wind generated power.

Recycled Materials

Steel constructed products are composed of 90 - 95% post-consumer recycled content. EKITTA plant-ers of 100% aluminum are made of 42% post-consumer and 40% pre-consumer recycled content percentages. Request order-specific environmental features reports from info@ekitta.com.

Materials used by EKITTA in packing and crating average over 80% recycled content and are 98% recy-clable. Effective packing methods and materials contribute to safe delivery reducing potential waste.

Made in America

EKITTA designs and manufactures 100% of the products in America and engages suppliers located close to our own manufacturing facility minimizing the environmental impact of our products.
